

**Save the Date!**

# **National Energy Extension Summit**

**April 29-May 1, 2013**

**Colorado State University – Fort Collins, CO**

## **What is it?**

The inaugural National Energy Extension Summit will bring together those who focus on developing and delivering energy extension. The Summit will focus on educational programming and techniques, especially concerning energy efficiency, small-scale renewables (e.g. geothermal, solar, small wind), and community-scale projects (e.g. biomass, hydro, large wind). Planned agenda items include:

- Panel discussions of individual state education efforts and best practices;
- Profiles of consumer, agricultural, youth, volunteer, and community energy education programs
- Keynote addresses concerning the role of Extension and land-grant Universities in energy education;
- Forums for networking and collaboration;
- Tours of CSU energy facilities, including the Engines & Energy Conversion Lab.

Are you interested in attending?
