

Community Accelerator Program
Thursday, May 9th Worksheet

1. What do the FCC broadband maps reveal about our area?

What do these maps say about broadband accessibility in our community? How might these observations help us understand community needs better?

2. How can we leverage broadband maps to support grant applications?

Discuss the strategic use of broadband map data in crafting compelling grant applications. What stories do these maps help tell about our community that can justify the need for funding?

3. How might mapping data be used to engage different stakeholders?

Brainstorm ways to present mapping data to stakeholders such as local businesses, schools, healthcare providers and non-profit organizations. How can this data help in rallying community support and collaboration?

4. Are there any discrepancies between the FCC maps and what we know about our community?

How might these discrepancies impact our approach to planning and advocacy?

5. How might broadband mapping data enhance our community survey efforts and the formation of our strategic plan?

*How can we use the data to inform the areas we focus on in our surveys?
How can we integrate the maps and survey data into our strategic plans?*
