Hi there,
Patty House (house.18@osu.edu) invites you to participate in the Doodle poll "STEM Pathways Signature Program Working Group".

Patty House says:
Dear Extension Professionals:

You are invited to become a member of the STEM Pathways Signature Program Working Group. This interdisciplinary team will work together to move the implementation and evaluation of Extension's newest Signature Program forward.

Recent statistics show STEM education in the U.S. is not improving. Extension has the opportunity to not just prepare youth for success with STEM education, but connect real-world problems solved through STEM with pesticide applicators, master gardeners, food service providers, landowners, community officials and others.

The STEM Pathways equation is simple...
Engagement + Problem Solving = Learning. Become a part of the team to pave the way for a targeted and viable Extension STEM initiative connecting the University's Discovery Themes, our Impact Areas, CFAES departments with colleges across OSU.

If you are interested in becoming an active working group member, please complete the doodle survey below regarding your available to meet in September. If you have questions, please feel free to contact me.

Patty House
STEM Pathways Signature Program Leader
